Lowe[®]

Manufacturing Company, Incorporated

Lowe[®]

Manufacturing Company, Incorporated

Productive, Durable, Value[®]

**Demand the best and
most durable auger
attachments for today
and tomorrow...LOWE[®]**

LOWE[®] has a worldwide reputation for productive, durable products that perform day after day, job after job.

Because of quality components, welding, and overall design, LOWE[®] augers will impress you over any competition. Exceptional efficiency and full-flow lubrication result in cooler operation, more durability, and less sensitivity to oil contamination.

LOWE[®] augers are so well designed that only two hydraulic lines are required. No third case drain line is ever needed.

Remember, without a high performance, durable attachment, your equipment is doing less than it should. You owe it to yourself to find out why LOWE[®] is the way to go.

Remember to check out our trenching and grapple attachments.

MADE IN USA

American made and family owned since 1971.

Auger Attachments

**Classic Series
Drive Units**

**A-Series
Drive Units**

Productive, Durable, Value[®]

Classic Series Auger Drive Units:

New durability and performance levels, all with the traditional **LOWE®** look.

Ultra reliable **LOWE®** hydraulic motors, solid unit structures, heat-treated alloy shafts, and an even heavier duty reduction drive are standard.

Balanced alignment means it is easier to drill a vertical hole. The protected hose routing minimizes component damage.

Productive, even more durable, and an incredible value.

Easy hose routing provides safe and dependable operation

New A-Series Auger Drive Units:

All American components.

Oversized gearboxes, a full-length housing, and premium motors all give maximum performance and dependability.

The compact in-line design and protected hose routing allow vertical holes in tight conditions.

Compare the A series with any competitor. In this case, it is true: *If it looks right, it is right.*

Productive, Durable, Value®

Model	Suggested Flow	Rec. Max Auger Size
750 Classic	6-20 GPM (23-76 Lpm)	24-inch (610mm)
1200 Classic	10-20 GPM (36-76 Lpm)	30-inch (762 mm)
1650 Classic	14-25 GPM (53-95 Lpm)	36-inch (914 mm)
2175 Classic	16-25 GPM (60-95 Lpm)	36-inch (914 mm)
A-165	10-20 GPM (38-76 Lpm)	30-inch (762 mm)
A-220	15-30 GPM (57-114 Lpm)*	36-inch (914 mm)
A-245	20-30 GPM (76-114 Lpm)*	48-inch (1,219 mm)**
A-275	15-42 GPM (57-159 Lpm)	36-inch (914 mm)
A-400	22-42 GPM (83-159 Lpm)	48-inch (1,219 mm)

* Use maximum figure for intermittent use only. ** For easier conditions only.
